Profile

I am a passionate Frontend Developer specializing in building dynamic, responsive, and scalable web applications using Angular, Tailwind CSS, and PrimeNG. Experienced in role-based dashboards, multi-language platforms, and secure API integrations, I write clean, maintainable code and collaborate effectively with teams to deliver high-performance interfaces, continuously embracing challenges to grow my skills.

EXPERIENCE

Frontend Developer | Full Time

Transport Information Technology (TransIT)

Developed and maintained the EAMS web platform (main website and admin dashboard) using Angular, Tailwind CSS, and PrimeNG, implemented bilingual support (AR/EN), built reusable scalable components, integrated RESTful APIs with efficient data handling, collaborated with cross-functional teams, and optimized performance for production readiness.

12/2025 – Present

Alexandria, Egypt

Frontend Developer | Intern

Sputnik Academy

Developed and maintained responsive user interfaces using Angular and modern web technologies, collaborated with the UI/UX team to ensure cohesive and functional designs, and improved code maintainability and performance through modular structures and best practices.

07/2025 – 01/2026

Alexandria, Egypt

EDUCATION

Higher Institute for Business Information System –
Bachelor's Degree in Business Information System
2021 – 2025

Technical Skills

HTML5, CSS3, JavaScript(ES6+), Bootstrap, Tailwind, SASS, JQuery, TypeScript, Angular19 RESTful APIs & HTTP Client, Angular Material, PrimeNG, Performance Optimization & Lazy Loading, Git, GitHub and Vercel.

Soft Skills

Problem-Solving & Debugging, Code Review & Best Practices and Collaboration & Communication.

PROJECTS

Egyptian Authority for Maritime Safety (EAMS)

A responsive web platform for the Egyptian Authority for Maritime Safety built with Angular 19, Tailwind CSS, and PrimeNG, featuring multi-language support (AR/EN), dynamic content for organizational info, news, and job listings integrated with RESTful APIs, and citizen services including medical check results, eligibility verification, and passport collection tracking, with reusable components and optimized performance for a seamless user experience.

Egyptian Authority for Maritime Safety DashBoard (Private)

Developed a role-based admin dashboard using Angular 19, Tailwind CSS, and PrimeNG, implementing secure login with role-specific access controls and guards, supporting CRUD operations for all entities, and enabling superadmins to manage users and roles, with reusable components and optimized performance for a scalable management system.

Sputnik Academy CRM (Private)

A scalable CRM system built with Angular 20 (Zoneless), implementing secure Google OAuth authentication with Refresh Token strategy, utilizing Angular Signals for efficient reactive state management, and featuring reusable components and dynamic multi-step forms, with a modern responsive UI powered by Tailwind CSS and PrimeNG.

FreshCart, E-Commerce

A dynamic Angular application with a scalable, component-based architecture featuring Reactive Forms with Angular Validators for robust form handling, a sleek fully responsive UI built with Tailwind CSS, and real-time state management using RxJS for smooth API interactions.

Movie App [🔗](#)

A responsive movie application built with Angular that integrates the TMDB API for real-time movie and TV show data, featuring a clean mobile-friendly UI with Tailwind CSS and PrimeNG, reactive state management with Angular Signals, and secure embedded YouTube trailers using Angular’s DomSanitizer.

COURSES

Frontend Diploma (with Angular 19)
Route Academy - September 2024 - March 2025
